

Technical configuration services

With a highly trained team of certified technicians, TD Logistics is able to offer configuration of all software and hardware, so whether you need some additional processing power, programme installation or a complete server custom built we have the knowledge and capability to deliver exactly that.

- Hardware installation – hard drives, tape drives, CPU, memory, fans, Power Supply Units etc. Including diagnostic tests to ensure all hardware is recognised and functioning
- Advanced operating system installation – installation of operating system and service pack / security updates.
- Installation of software applications
- RAID configuration
- Memory upgrades
- Desktop and laptop configuration services (hardware and software installation)
- Imaging
- Pre-delivery soak testing – we will test your PC's for up to 48 hours to ensure they do not crash or corrupt
- Diagnostic test reporting
- Asset tagging
- Serial number capture
